SUMMARY

B.E. Computer Science student (2028, CGPA 9.47/10) seeking SDE, Backend or Full-Stack internships. 700+ DSA problems in C++ with strong OOP and low-level design; 3 full-stack apps on React, Node.js, PostgreSQL.

EDUCATION

Sathyabama Institute of Science and Technology — Chennai, India 2024 - 2028

B.E. Computer Science and Engineering CGPA: 9.47 / 10

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Machine Learning, Software Engineering

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, TypeScript, Python, SQL

Frontend: React, Next.js, Redux Toolkit, TanStack Query, Zustand, Tailwind CSS

Backend and APIs: Node.js, Express.js, Hono, REST APIs, Clerk, Convex

Databases and ORM: PostgreSQL, MongoDB, Prisma, Drizzle

Machine Learning: Supervised and Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering

Tools and AI: Git, GitHub, Linux, Vercel, Postman, Groq API, Claude API, Cursor

Competitive Programming: 700+ data structures and algorithms problems solved on [LeetCode](#) and GeeksforGeeks; currently studying Low-Level Design with SOLID principles and design patterns in C++

PROJECTS

Finance SaaS Platform | Next.js, React, TypeScript, Hono, PostgreSQL, Drizzle ORM, Clerk, Plaid, TanStack Query  

- Architected a multi-tenant personal finance product with authenticated data isolation, keeping every tenant's records scoped to its own account across **3+** premium analytics modules.
- Integrated the Plaid API to remove manual transaction entry entirely, so linking a bank account in **3** steps back-fills and syncs history automatically.
- Cut account setup from hours of typing to a single upload with a CSV importer handling **1,000+** records, and surfaced spending through Lemon Squeezy billing and **5+** Recharts KPI cards.

Project Management Platform | React, Node.js, Express, PostgreSQL, Prisma ORM, Redux Toolkit, Tailwind CSS  

- Replaced scattered spreadsheet tracking with multi-workspace task boards that enforce member assignment, deadlines, and role-based permissions across **4** access levels.
- Served every board, task, and comment read through REST endpoints on Node.js and Express over PostgreSQL with Prisma, gated by Clerk auth across **3** task stages.
- Embedded a Groq-powered assistant that answers project questions in context, so new members self-serve instead of asking a teammate, across **4+** distinct user roles.

Jotion — Collaborative Document Workspace | Next.js, TypeScript, Convex, Clerk, BlockNote, Tailwind CSS  

- Crafted a live editing workspace on Convex with a nested document tree, holding **2+** open sessions in sync within about **1** second of each edit.
- Made deletions recoverable: **4** document actions — publish, unpublish, archive, restore — and **2** themes.

CERTIFICATIONS AND ACHIEVEMENTS

- **Supervised Machine Learning: Regression and Classification** — Stanford Online and DeepLearning.AI, Coursera. [Verify](#)
- **Research Paper, ComSIA-2026, University of Delhi** — co-authored and presented “Strive Hive: Application for Data-Driven Health and Fitness Decision Making,” March 2026. [View](#)
- **Chancellor's Scholarship Merit Certificate 2026** — ranked **11th** among **1,700+** B.E. Computer Science students through the fourth semester.
- **Luminary Award 2024-25 and 2025-26**, Sathyabama Institute — back-to-back recognition for academic standing and technical contribution.

LEADERSHIP

Executive Committee Member, IEEE Women in Engineering — Sathyabama Jul 2025 - Feb 2026

- Ran **5+** technical workshops on web development, competitive programming, and algorithms, mentoring **150+** students and owning speaker coordination and logistics for audiences of **100+**; awarded a Certificate of Recognition.
